Dividends!

Again a 2% Purchase Dividend to our Patrons

Isn't it a help, especially at this time of year, to find your buying power increased by the dividend from your own store? And what must appeal to you more is the fact that you as shareholders and patrons are not being given something for nothing, but rather are being returned that which you helped to earn, for therein lies the true spirit of co-operation.

"All for each, and each for all"

So bring in your tickets, and also a resolve that you are going to support and boost your own store in 1929 as you never did before.

HERE ARE A FEW SUGGESTIONS ON HOW TO SPEND THAT DIVIDEND CHEQUE

For Baby—Bootes, Bonnets, Jackets, Comforters, Blankets, etc.
For the Kiddies—Slippers, Kidney Beans, Tablets and Chairs, Kankies, etc.
For the Girls—Handkerchiefs, Slippers, Belts, Hose, Candy, etc.
For the Boys—Mouth Organs, Ties, Belts, Stockings, Slights, etc.
For Mother and Sister—Silk Lingerie, Hosiery, Towels, Rayon Bed Spreads, Dress Lengths, Sweaters, Cushion Covers, Chocolates, etc.
For Dad and Brother—Ties, Sox, Suspenders, Belts, Tie Pins, Slippers, Tobacco Pouches, Cigars, etc.
For—Jars, Oranges, Biscuits, Candy, Xmas Crackers, Preserved Ginger, Cluster Raisins, and all the rest of the good things that go with Xmas Cheer.

The New High School Curriculum for Alberta.

CAN WE AFFORD IT?

The introduction of the New Curriculum for Alberta High Schools, coupled with the unit system of presentation, has unquestionably added to the average student's year of study for the average student. This certainly may be feasible but, the high price tag, one we afford it? That is a very pertinent question. Parents and taxpayers, students and teachers, have an acquaintance more or less willingly over a period of five years in being parties in an experiment. It is therefore time to consider where we are, and whether we are bound. Unfortunately the general public has not yet got down to a realization of the effects of the new curriculum, and consequently their reaction has not made itself felt. The New Curriculum has been at least a solid experiment in the opinion of those who administer it. The new course is much superior to the old, and provides a more complete education. It is much more desirable, for in the event of failure in certain subjects, students are no longer required to repeat a whole year's work, and individual subjects unacceptably attempted may now be carried over for completion in succeeding years. Basically stated, the Department of Education has put out a high school a better curriculum, but at the same time, and quite unwittingly, has increased the cost of our education. The present course can be most easily applied to the satisfaction of all concerned, provided parents can afford to pay the extra cost for the new curriculum. If, however, the economic factor should require the average student to graduate four years, then it is absolutely necessary to eliminate in their entirety some of the present units, or else cut down the amount of any which are now presented.

That the average student would be able to undertake and complete average units per school year was certainly expected when the new curriculum was inaugurated five years ago by the committee which worked out the details of the scheme. It is now evident that the average student has been attempting to do too much, but he has, as it were by the following table compiled from statistics furnished by the Department of Education.

HIGH SCHOOL EXAMINATION RESULTS

1. Average number of units written by students who wrote on five or more units—Exam. Session, 1927, 7,000, 1928, 7,000.
2. Average number of units passed by students who wrote on five or more units—Exam. Session, 1927, 5,387, 1928, 5,387.

The above table proves a palpable failure of the working out of the scheme and it might be said to signify a passing and an exit.

Normal, Entrance (Second Class)—the old Grade XI or Junior Matriculation, such required the completion of twelve units. The new curriculum, however, does not bring in the cost of the present units, twenty-two, from among the new units, but with each course with an average of five units per year. It is quite evident that the average student requires five to six years to complete what was intended to be a four-year course.

FOURTH YEAR HIGH SCHOOL (First Class)—the old Grade XII, which required twenty-two units, and Senior Matriculation requires thirty, while a complete course of these two courses entails the completion of thirty-two units. It is evident, therefore, that the average student will consume five years to the year to graduate from high school instead of four years as was expected.

It is eight days before the September Supplemental examinations begin to the average student for graduation, but the time taken for the exam is not available, it must not be supposed that the Supplemental Examinations in September do really offer any substantial aid to the general deficiency of the year's advancement. It is pertinent to recall, the average student did not graduate right in scheduled time (Grade XII three years and Grade XI three years) and not only was able to do so but, also, the old course was completed with greater ease than is now experienced in completing the present average of 4.5 units per school year.

REDUCE BUFFALO HERD

AT ELK ISLAND PARK

Another Instance of Canada's Success in Bringing Back the Buffalo

A gratifying feature of Canada's adventure in bringing back the buffalo is the way in which the different herds continue to multiply and to expand beyond the capacity of their once ample grazing ranges. The case of the main herd in the Watkinsburg, Alberta, in which there was an increase from about 700 head to 17,000 head in eighteen years has often been cited. This year 1,085 animals were seen south of Watkinsburg in the Wood Buffalo park over Fort Smith, North-west Territories, and of the herd at

Prof. Ed. Danah Harrison, who distinguished himself at the New Curriculum, Prof. Harrison will star with his repertoire of Wild West acts at the Buffalo Park to be held in Vancouver, January 1st. The Buffalo Park will revive the old days of many nations, besides a great deal of other music associated with the era.

Elk Island park, two hundred animals have been slaughtered and their carcasses and hides disposed of commercially. That two hundred buffalo could be disposed of without wiping out the entire herd at Elk Island park will surprise most people who have not closely followed this experiment. Nor is this surprise to be wondered at. When the original herd was purchased from Michael Peck, speedy action had to be taken to remove them. Seventy-eight of the herd were being such as to reduce the buffalo park at Watkinsburg, could not be erected overnight and the first shipment received from Watkinsburg was placed in Elk Island park, a fenced wild animal enclosure, fifty-one square miles in area, about 37 miles northeast of Edmonton. It was soon as the first shipment was received by the fact that the shipment was moved to the Buffalo park about fifty head which could not readily be rounded up were left at Elk Island to roam with the deer, wapiti, and other animals there. These few animals were soon as the other animals in the park was felt to be beyond the grazing capacity of the area and the disposal of two hundred head seemed advisable.

Unexpectedly, however, interest has been shown by citizens in the fact that the introduced buffalo meat in limited quantities and a few choice robes and heads are from time to time available at auction (strictly centered in the success achieved in bringing back the buffalo in the prairie region and in the establishment of a great herd in the far north where the cow-bone lord of the plains will play a large part in the development of Northern Canada.

God's Plan in the Bible

You are talking advantage of the illustrated talks on the plan of the Bible? There are a goodly number who are profiting by these talks can you afford to miss them? You can't know your Bible and here is the opportunity to get acquainted with it. Every Sunday from 12 to 1 p.m. These talks are given in the Baptist Church.

Cards of Thanks

Master Harry Bell wishes to thank the Junior Girls' Institute for the lovely present sent to him during his recent illness.

Mr. and Mrs. A. C. Puller desires to thank the Ladies' Aid and Women's Institute for the beautiful flowers sent Mrs. Puller during her recent illness.

STONELAW NEWS

Willie Reeves met with a bad accident on the road home from school on Friday last. In turning a corner his car went over a bank and he was pinned underneath, when fortunately he was not hurt. He found him life was a complete wreck. All his friends wish him a speedy recovery.

The next snow storm from Brynmore is getting under way. Some of the boxes arrived last week.

Prepare for Training Live Stock Breeders to Hold Annual Meeting

Registration is announced from London of the agreement between the British, Dominion and Provincial Governments, whereby from training in agriculture will be given during the coming spring and summer to several hundred young men and women from the British Isles. Arrangements are being made to provide a month's course of instruction for these young people at the Provincial School of Agriculture at Oke and Verulam. The immigrants under the ages of 17 and 25 and young women between 25 and 35. Male graduates under 19 will receive the course free but if over 19 will contribute the new \$50 rate. The women will travel at the reduced rates granted to domestic servants. The only cost to the student will be board and lodging at the schools of agriculture and their farm from the schools in their place of employment. Following their course of training, these young men and women will be provided with agricultural and domestic positions on farms in the province.

Live Stock Breeders to Hold Annual Meeting

The annual meeting of the Alberta Provincial Horse, Cattle, Sheep and Swine Breeders' Association will be held in Edmonton, on January 9 and 10, the evening breeders leaving their country on Wednesday, January 9, in the morning, with the sheep breeders in the afternoon, the horse and cattle breeders taking Thursday morning and afternoon respectively, with a luncheon for all four associations on the evening of January 10th.

Some women think the only way to keep a husband in his hat is to make it exclusive.

However, we notice the cost of living isn't sufficiently high to make it exclusive.

Built on the confidence of our employees, the Family Handy and Weekly Star, Montreal, stands as a surety that among farm papers, with its negative section is easily at the head of the list.

OBITUARY

Mrs. JULIA A. GRIDER

The passing of this estimable lady, the great beyond, relief of the late W. A. Grider, who predeceased her about a year ago, took place in the home of her daughter, Mrs. J. H. Murdoch, 4th Ave. N.W. Calgary, Alberta, on Monday, 10th inst., from causes. The remains were shipped to Delia for burial in the family plot on Wednesday.

The funeral was held on Thursday, Dec. 13th, services being conducted by the United Church by Rev. G. A. Steele, after which internment took place in the Delia Cemetery.

At the service in the United Church the choir rendered the hymn "Rock of Ages"; Miss Louisa May Boyd; "and "Aldie with Mrs. Mr. and Mrs. A. S. Stenhouse sang a duet—Sleep on, beloved, sleep and take thy rest." Miss Jean McDonald officiated at the organ.

The pall-bearers were: J. C. McCully, Chas. Horner, F. Palmer, Alex. Morrison, Peter Thompson and Wm. Sinclair.

Interment—Final Interment—Charlie and Ruth, Esther and Victor, Oliver and Clarence, Mr. and Mrs. J. W. Murdoch, Mr. and Mrs. Wm. Sinclair, Mr. and Mrs. A. Dawson, Mr. and Mrs. J. J. Bradford, Mr. and Mrs. G. Dundell, Mr. and Mrs. Leslie Dundell, Mr. and Mrs. Ernie Dundell, Mr. L. E. Mason and Mr. and Mrs. A. Mason, Mr. and Mrs. Chas. Horner, Mr. and Mrs. Geo. Lowe, Mr. and Mrs. W. Carter, Mr. and Mrs. W. Brown, Mr. and Mrs. A. C. McCully.

Walter Ross, Funeral Home, Drumheller, in charge of the funeral arrangements.

Quail Imported by Game Association

Fifty pairs of Bob White quail have been imported from the state of Mississippi by the Calgary Game and Game Association. The birds will be kept in pens in Calgary and will be turned out to the surrounding district during the coming season, next spring. The experiment is being made by the Association to the hope that the quail game bird will flourish in Alberta as a number of other species introduced during the past few years.

Radio Dispatching Ties Hazard Out Of Aerial Ventures In Northern Reaches of Canada

The epoch-making flight of the planes of Dominion Explorers Limited, from the vicinity of Chesterfield Inlet, in Hudson Bay, to the west coast of northern transportation in Canada, says the National Intelligence Service, The flight was made under winter weather conditions and the planes were with only six men.

The story of the successful trip out from the winter headquarters of the Department of Northern Development, in almost the same latitude. There are such were the important aspects to the accomplishment of the use of this as the winter flying conditions, for such flying was accomplished in March, 1921, when the Imperial Oil Company's planes flew into Port Simpson on the west coast of Hudson Bay, in almost the same latitude. There are such were the important aspects to the accomplishment of the use of this as the winter flying conditions, for such flying was accomplished in March, 1921, when the Imperial Oil Company's planes flew into Port Simpson on the west coast of Hudson Bay, in almost the same latitude.

The Imperial Oil Company's venture was also epoch-making and it, too, was accomplished under winter conditions with no advance preparations. The two planes flew across unmappped and unexplored territory, and made the towns of Peace River and made the first landing in the Northwest Territories at the town of Chesterfield Inlet. Simpson, Mineral wealth and oil was there as in 1924, and communication was established on the north coast three months before the first of the river navigation season. The flight was successful, but there were weeks of anxiety following the one of the planes. The planes turned aside and landed on Bear Lake near Peace River. Both planes had with winter equipment, including at Simpson, and Indian caribou and native game were required in successful flight. The proprietor of the plane which was the first to arrive.

That was in 1921, and except for one winter mail taken in by dog sleds, no regular communication with the north was possible. The first step was taken toward the establishment of government wireless stations and the chain of communication now includes Edmonton, Port Smith, Resolute, Simpson, Atlatik and Herschel Island, on the east of the northern plane there is the government station at Chesterfield Inlet, and to the south there are the stations maintained by the Royal Canadian Air Force for its recent air patrol services.

In addition there are now private stations established by mining and prospecting companies who have invaded the fastnesses of the north. They are fastnesses no longer and therein lies the real reason in the Northern Explorer's exploit. The first step was taken toward the establishment of government wireless stations and the chain of communication now includes Edmonton, Port Smith, Resolute, Simpson, Atlatik and Herschel Island, on the east of the northern plane there is the government station at Chesterfield Inlet, and to the south there are the stations maintained by the Royal Canadian Air Force for its recent air patrol services.

The Dominion Explorers' winter headquarters on Herschel Island, 140 miles north of Port Churchill, is being kept in communication with the winter headquarters of Toronto at 1400 miles to the south. Some of the radiograms exchanged have been of the most interesting and interesting reading. They indicate the importance of radio in communication, and the use of radio in the winter when the lakes are impassable and the land and boat routes are uncertain.

On October 12, Mr. Blamont, the officer in charge of the northern exploration, radioed to Toronto that two planes were leaving the following day for the coast of Hudson Bay. These planes were then equipped with wireless stations and Toronto headquarters promptly advised Mr. Blamont that

the Sherbrooke station reported the planes in the vicinity of Chesterfield Inlet, in Hudson Bay, to the west coast of northern transportation in Canada, says the National Intelligence Service, The flight was made under winter weather conditions and the planes were with only six men.

Sunlight and Dairy Products

3300, Cream and Butter Should Not Be Exposed To Direct Sunlight

Dr. R. G. Hood, chief of the division of research of the federal department of health, states that it is a well established scientific fact that direct sunlight has a detrimental effect on the flavor of practically all dairy products and especially on milk, cream and butter.

This statement was given by Dr. Hood when questioned regarding the practice of the dairymen of placing milk as refrigerators during the summer season when they have stopped milking cows. From the standpoint of keeping the products cool the wisdom of direct sunlight is questionable. This is because the sun's rays when they enter the window is located where they can reach it, dairy products are very sensitive to heat. Milk, cream and butter when exposed to direct sunlight quickly develop abnormal flavors which are generally of a metallic or fatty nature. This is because the sun's rays when they enter the window is located where they can reach it, dairy products are very sensitive to heat. Milk, cream and butter when exposed to direct sunlight quickly develop abnormal flavors which are generally of a metallic or fatty nature.

Dr. Hood states that if consumers of dairy products are to be protected, it is in their favor after keeping it for twenty-four hours, they should not place the milk in a glass container, but in a metal one. If these dairy products have been kept in a window exposed to direct sunlight, they should be kept in a metal container, but in a metal one. If these dairy products have been kept in a window exposed to direct sunlight, they should be kept in a metal container, but in a metal one.

Produce Light By Sound Waves

Sheds On Airplane When Sound Lights Up Landing Field

The screen of a shed on the wing of an airplane wailed sound waves through the air which threw the shed into light. The shed into light. The shed into light. The shed into light.

Makes Interesting Forecast Of Improved Farming Conditions In The Next Twenty Years

Adopting the method of Estuary in this famous work, "Looking Backward," the author, H. D. Dore, of the Ontario Agricultural College, University of Toronto, presented an interesting forecast of the future of farming in Canada, in 1940, in his address to the National Farmers' Union, at the University of Toronto, on the 10th of the month.

is no pursuit more conducive to health and happiness than the study of plants. It keeps one largely in the open air, and promotes pure and helpful thinking. For this reason, students should lead the minds if their children to the study of plant life."

During her father's lecture, Conde's eyes scarcely left Donald's face.

The latter from the distance of the corner noticed her looking at him

and stranger, and his dusky eyes glit-

tered with indignation. "You are

very young to be so interested in

plants, and only one can be inter-

ested in them," he said, "and I am

nothing but a student of the subject."

"You are a student of the subject,"

he said, "and I am nothing but a

student of the subject."

"You are a student of the subject,"

he said, "and I am nothing but a

student of the subject."
